Building your own module manager in JAVASCRIPT

Manoj Singh Negi

Driven by the 'Why' | Inspired by solving real-world problems |
Sharing insights to help others move forward
Chandigarh, Chandigarh, India

Summary

I'm driven by a simple belief: anyone can achieve their goals and create meaningful solutions with the right tools and focus. Solving real-world problems inspires me, and I'm passionate about building solutions that help people cut through the noise, focus on what truly matters, and deliver real value.

I build tools that empower others to create and innovate, and I share my knowledge to inspire people on their journey. With a learner mindset, I'm always exploring new ideas, technologies, and approaches to improve and grow.

With over a decade of experience as a Senior Software Engineer, I've honed my skills in building software using JavaScript, Node.js, and AI technologies. My work focuses on creating impactful solutions that address complex challenges.

Feel free to reach out to me I'd love to connect.

Experience

Brij
Senior Software Engineer
November 2021 - January 2025 (3 years 3 months)
United States

ZdravyStul.cz
Lead Software Engineer
August 2018 - October 2019 (1 year 3 months)
Prague, The Capital, Czech Republic

I am responsible for developing the product front-end and also consulting the team about everything that will make our product a top quality product for our consumer. I handle front-end architecture, coding structure, and tooling involved to build the product.

tecHindustan
Front End Developer
September 2016 - June 2018 (1 year 10 months)
Chandigarh Area, India

tecHindustan Solutions (P) Ltd hired me as a Front End Developer to write interfaces for Mobile and web applications to integrate Back End services into Front End UI. I mostly work in a NodeJS compatible environment (installing modules, building toolchains, webpack, babel) and use ReactJS for most of the front end code.

Key focus of my role as a Front End Developer Includes :-
1. Develop client side code to act as a bridge between Back End services and Front End UI.
2. Using Angularjs and Ionic to develop Quality code.
3. Developing component based front end UI in ReactJS and Handle app state with Redux.
4. Working with NPM modules and DevOps build toolchain.

Genesis Soft Tech
Web and Mobile apps Developer
March 2016 - August 2016 (6 months)

Started to work here as a Full stack developer. My role here ranges from understanding business logic of a client to providing him with a full blown app. I was responsible for writing UI , Bridge Apis , Real time applications , Restful services , Back End code , data base integration,

Working at Genesis Soft Tech is a Fun and overall a fulfilling experience. My role at Genesis Soft Tech Includes:-
• Writing Front End UI. (Bootstrap , HTML5, CSS3)
• Developing Bridge between Back End and Front End logic. (Angularjs , Jade, Stylus, Grunt)
• Writing Real Time Back End services. (Nodejs, Socket.IO, Express)
• Working with real time and NoSQL databases (RethinkDB , MongoDB).
• Developing Mobile and Desktop apps. (Ionic , PhoneGap and Cordova , Electron)

• Finding and providing solutions to programmatic problems.
